★ Participation IN bC India 2011

The BAUMA CONEXPO SHOW in India—bC India—was held on 8 to 11 February 2011 at the Bandra Kurla Complex in Mumbai and exceeded all expectations. Aquarius had booked an impressive outdoor stall and exhibited its latest range of Batching Plants & Concrete Pumps. This year we had a theme based stall highlighting the High Rise range of concrete pumps. The main attraction was the launch of new concrete pump model "703 D" and the new Mobile Batching Plant viz MP 30. The 703 D model is the smallest & the most fuel-efficient pump in Aquarius product range, where as the new MP 30 plant features an enhanced aggregate weighing system. Aquarius had also exhibited, this time, an aggregate loading conveyor with swivel chute for quick loading of aggregates. The other main products exhibited were Stationary and Mobile Batching Plants, 36m Boom Pump, MOLI and a wide range of Concrete Line Pumps. The response to the exhibition was excellent with a good flow of quality enquiries. Many clients, suppliers, customers and dignitaries visited the stall.

Aquarius Stall in Bauma Conexpo 2011

★ 703 Model Launch

Aquarius has launched a new model of concrete pump viz. 703D. It is the smallest and most fuel-efficient pump in Aquarius range. This model is aimed at the contractors who find the 40 m³/4 cylinder engine design too big & uneconomical for their needs. This is a rugged and fuel efficient pump in the 700 series. The 3-cylinder engine concrete pumps have the smallest towing length in this class and are very easily maneuverable. Moreover, a high cylinder diameter of 200mm ensures use of higher size of aggregates, as available in various parts of our country.

★ 1400 HPD Selection for 300 m Vertical Pumping

M/s. Shriram Urban Infrastructure, Mumbai has selected Aquarius High Rise Pump 1400 D HPD for its prestigious high rise project Palais Royale at Mumbai.

The order was received against stiff competition for the high rise application, however, judging from the specifications of the Aquarius HPD Pump and the earlier performance, the customer had no hesitancy in placing the prestigious order on Aquarius.

★ Achievement in RMC Segment

The new SP 60 Batching Plant has become a hot selling proposition post bC India, with many installations across the country. Jakhotia Readymix Concrete a franchisee of Birla Shakti Concrete has recently produced 624 m³ concrete, from the SP 60 plant, in a span of 20 hours. This feat was possible with dedicated efforts by their Top Executive, Mr. Yaswant Mishra, I.K.Purohit, Sunil Dandotiya, Natwar Daga, O.P.Jakhotia, G.D.Bajaj and team.

★ SICOMA Mixer Training

A detailed training program was arranged at the Ambadwet, Pune factory for Aquarius Plant Engineers. Mr. Marco from Sicoma, Italy conducted the program comprising of the operation, maintenance & synchronization of the Twin Shaft mixer and it's operational parts. A briefing was also done about the various (standard & optional) components, supplied with the Mixer.

★ Participation in Concrete Panorama & Deminar 2011, Bangalore

A concrete Panorama and Deminar for the construction industries was organized by the INDIAN CONCRETE INSTITUTE, Karnataka – Bangalore Center. Being the first of its kind in India, the exposition showcased the latest equipment, products, services and technologies in the Concrete Industry.

A comprehensive program was held during the three-day exposition. The event was designed to serve the needs and interests of all manufacturers, designers, builders, contractors and others involved in the concrete industry. The event was efficiently managed by our Bengaluru Office.

★ Training at COEP

A Concrete Pump and Batching Plant Training Program was held at Civil Department of College Of Engineering, Pune.

More than 65 students attended this training. The training covered various technical sessions on Concrete Technology, Concrete Pumps and Concrete Batching Plants. Training was conducted by Mr. Sudhakar Waggh, Mr. Kiran Sonawane and Mr. Muzaffar Shaikh.

Kudos to the Training Team!

★ Market Moves

Infrastructure sector is booming in India, which will remain the vital sector for India's growth. The growth of Indian Infrastructure sector will continue with the proposed allocation of Rs. 2,14,000 crore, which is 23.3% higher than the last year. In order to give a boost to infrastructure development in railways, ports, housing and highways development, tax-free bonds of Rs. 30,000 crore will be issued by various government undertakings in this current year.

★ Sales Update

In order booking for 4th quarter, West region continuous to maintain its lead position with 60% Pump sales & 65% plant sales of respective order bookings in this quarter. This was followed by North Region with 34% pump sales and 21% Plant sales by South region. The annual Pump Sales was lead by 1004D, 1004D SHP & 1405 D, whereas MP 30, SMP 30 and SP 60 were the best sellers in Plants.
